Pre-commissioning  
and Commissioning

Manpower Specialist

## General Contractor

Tozzi is a leading Italian company that started out installing electrical components and instrumentation, and has expanded into the supply of advanced electrical systems both in the mechanical and the E&I field. Today Tozzi operates as a general contractor in Mechanical, Electrical and Instrumentation Industrial installations, including DCS, ESD, F&G, for the Oil & Gas (upstream and downstream), Power generation, Utilities, Industry and Tertiary sectors.

In airports, Tozzi not only offers its services in primary and secondary distribution, but also has experience in airfield ground lighting.

### **M&E&I INSTALLATION: FROM MECHANICAL COMPLETION, PRE-COM, COMM UP TO START-UP**

Our mechanical skills range from Pipelines & Multi-Utility Networks to Construction Management, Plant Construction and Erection works, Highly Specialized Manpower Supply and Maintenance, in order to provide a complete, competent, and efficient professional service. We are fully equipped to provide a reliable home office and site service, guiding the Client smoothly through the phases of mechanical completion, pre-commissioning, commissioning and start-up of the plant and the final performance tests. This is our way to be also a partner and not only a subcontractor.

## Working side by side

Our company follows the same operational procedures whether the task is to supply a power generation unit, build topsides facilities for a Floating Production Storage and Offloading installation, perform the installation of a hydrocracker unit in a refinery or attend pipeline maintenance. Tozzi operates mainly within EPC (Engineering, Procurement, and Construction) contracts, i.e. taking full responsibility of the entire process, from the engineering phase, to material management and supply through to construction, until all of the Client's performance requirements are met.

***We support our Clients throughout the whole project, working together with them from the commitment to the start-up.*** We pay close attention to the engineering, the assembly of the main equipment in our workshops, the installation of the plant and equipment on site. Along the way, we verify the progress of the project daily, providing our Clients also with post installation assistance as well as sound and reliable training and maintenance services.

## Service & support

You can always rely on our support services. We make the difference in assisting our valuable Clients in order to make the unit or service they purchased from us cost effective. We are used to working closely with our Clients, and become very familiar with all aspects of their operational life. This means our Clients feel comfortable with us when planning, installing, training, trouble shooting, maintaining, upgrading, and finally disposing of the unit. ***Our approach with Clients is not only to provide a first-class and related support***

***experience, but to go beyond their expectations.*** Clients, like our people, are a valuable asset and we are in constant search of feedback. Our Clients are guaranteed that the same engineers who designed their unit will be available when needed to make the service easier, faster and smoother. We listen to our Clients. Any suggestion and recommendation will be promptly implemented. Is there something else we can do for you?

## WHAT WE DO

MECHANICAL ERECTION AND INSTALLATION

START-UP ASSISTANCE

ELECTRICAL & INSTRUMENTATION  
INSTALLATION

MAINTENANCE SERVICES

CONSTRUCTION MANAGEMENT
